PISTON ENGINES & PARTS

LYCOMING & TELEDYNE CONTINENTAL MOTORS

Scanaviation has for more than 50 years been working on aircraft engines. From complete overhauls and repairs to shock-loadings we are the # 1 shop in northern Europe. We are doing more engines than any other shop in the region. Reliability, precision, flexibility and sky-high professionalism are all quality parameters paired with full government approval. No engine leaves our shop without a final test-run in our own test bay. A release tag from Scanaviation is a guarantee for superior safety and performance. Don't go for less! We provide engines on sale & exchange either from our own pool or from the key manufacturers, Lycoming & Teledyne Continental Motors.

OVERHAUL - EXCHANGE - REPAIR - SHOCKLOADING INSPECTION

Our propeller shop has approval to work on the following prop manufacturers:

PROPELLERS

HARTZELL • McCAULEY • SENSENICH

Scanaviation is a service centre for these most common manufacturers. Our reputation is unrivalled no matter if it has to do with a fixed pitch propeller or a more sophisticated and complex variable pitch propeller. We service them all, and we have all the necessary equipment and tooling to do a 100 percent inside job without costly delays. Up to date documentation, know-how, experience and genuine parts are used to secure minimum down time and maximum quality. We comply with all service bulletins in force. We carry a large inventory of spare components and parts with full traceability to the OEM. A Scanaviation label on a propeller is the proof that it has been serviced in accordance with the manufacturer's specifications!

COMPONENTS - SPARES - CONSUMABLES

SPARE PART SUPPORT

ANY AIRCRAFT TYPE

Thanks to our agreements with major aviation equipment manufacturers, distributors and stockists we are proud to announce that we can handle any spare part requirements in the General Aviation world. We are constantly adding new product lines and supplementing our inventories to meet the challenges from the market. Moreover, our capability to locate hard-to-find items for out of production aircraft and vintage aircraft are renowned and unsurpassed. We strive to find the safest and most economical solution for our customers by proposing alternate products and solutions. If you are looking for a dedicated partner to assist you and want to be supplied promptly and efficiently, you don't have to look any more. Our priority # 1 is to supply top quality spare parts, immediately, competitively and with the right certification. What more can you ask?

ACCESSORIES & COMPONENTS

OVERHAUL/EXCHANGE

The combination of in-house capabilities, component pools and agreements with exterior FAA/JAA approved facilities enables us to offer an almost 100 percent complete package of components - no matter what manufacturer or purpose. We are capable of delivering service to GA components comprising: starters, alternators, magnetos, pumps, fuel injection systems, vacuum pumps, carburetors, turbochargers, governors, heaters, generators, motors, blowers, actuators, landing gears, regulators, brakes, beacons, accumulators, starter generators, instruments, and much, much more. These components are offered on outright basis, exchange or repaired as required. Components that we do not deliver right off the shelf, we deliver with shortest possible lead-time from approved sources. We are truly AOG experts.

EXCHANGE - OVERHAUL - REPAIR

SCANAVIATION IS AUTHORIZED DISTRIBUTOR FOR THE FOLLOWING COMPANIES:

TELEDYNE CONTINENTAL MOTORS
McCAULEY PROPELLERS
UNISON INDUSTRIES
PRECISION AIRMOTIVE
LAMAR ELECTRONICS

SUPERIOR AIR PARTS
BRACKETT AERO FILTERS
GOODYEAR
KELLY AEROSPACE
